INLINE CARBON FILTER

We are mostly preferred among clients for manufacturing and exporting a wide stock of Inline Pre Carbon Filter. These carbon filters are widely used in water purification systems for effective filtration of impurities. Available in wide options of specifications, these filters are in accordance with the industrial standards and norms. We make sure to test each and every Inline Pre Carbon Filter on defined parameters before the final dispatch so that our clients the flawless quality at their end. These are used in RO systems, water coolers and beverage processing

CARBON FILTER is of three filters

- Sedimental filter
- Pre carbon filter
- Post carbon filter

SEDIMENTAL CARBON FILTER

Sedimental carbon filter removes all particles like dirt, rocks, sands, etc.

PRE CARBON FILTER

This pre carbon filter removes chemicals like chlorine from water. Recommended life of pre carbon filter is 4 to 6 months.

POST CARBON FILTER

This pre carbon filter removes chemicals like chlorine from water. Recommended life of pre carbon filter is 4 to 6 months.

Features

- Can sustain maximum pressure of 125 psi
- Can withstand maximum temperature of 100°C
- Longer shelf life
- Easy to install and replace
- Can be used with different filter media

Technical Specifications

- Body size: 2.5" D x 12" L
- Flow rate: .5 gpm
- Service Life: 2500 gal. to 1 year
- Taste, odor & chlorine reduction
- Maximum one-year service life

FILTER HOUSING

We are sincerely involved in offering a qualitative series of RO Booster Pump. It is developed with great accuracy in sync with the quality defined by industry. The entire items are made to undergo various stages of quality tests to ensure its authenticity and durability. We supply this at industry leading rate.

Features :

- Simple installation
- High durability
- Strong design

Flow-Restrictor-FR

Our range of products includes highly qualitative Water Purifier Pump FR. Manufactured using premium quality raw materials, these pumps are installed in water purifiers for the purpose of purification of water. These purifier pumps are known for being easy to install and maintain. These sturdy and damage-resistant pumps are available to clients in various sizes and specifications at leading market prices. These pumps are available to clients at reasonable market prices.

Features :

- Easy to install
- Low maintenance needs
- Damage-resistant
